4. Write a LEX program to print all the constants in the given C source program file.
Input Source Program: (sample.c)

```
#define PI 3.14
#include&lt;stdio.h&gt;
#include&lt;conio.h&gt;
void main()
{
int a,b,c = 30;

printf(&quot;hello&quot;);
}
```

Write a LEX program to count the number of Macros defined and header files included in the C program.
Input Source Program: (sample.c)

```
#define PI 3.14
#include&lt;stdio.h&gt;
#include&lt;conio.h&gt;
void main()
{
int a,b,c = 30;
printf(&quot;hello&quot;);
}
```

```
C:\Users\nadim>set path=C:\Users\nadim\OneDrive\Documents\GnuWin32\bin

C:\Users\nadim>flex cons.l.txt

C:\Users\nadim>set path=C:\Users\nadim\OneDrive\Documents\MinGW\bin

C:\Users\nadim>gcc lex.yy.c

C:\Users\nadim>lexer.exe
Constant: 10
String Constant: "Hello World"
Constant: 0
```
